Unified. Streamlined. Scalable.

Unify the Management of Multiple Databases, Applications and Workflows.
Unsurpassed Integration.
Carestream’s Unified Core fully integrates your clinical imaging, workflow and reporting infrastructure, providing a shared architecture that accommodates all major clinical data formats and communication protocols.

Advantages At a Glance
• Simplify your IT environment, leveraging a single solution for all medical images.
• Protect your data with a unified security engine across all modules.
• Facilitate effective collaboration between caregivers with workflow orchestration, multimedia reporting, smart chat and native screen-sharing functions.

A Unified Approach to Faster Workflow and Enhanced Care.
Our Unified Core is true game-changer. You can depend on it for all of these advanced features:
• Standards-based interfaces, APIs and communication protocols support integration of legacy systems, accommodate unlimited expansion and connect with rest of your IT ecosystem.
• A unified framework ensures accessibility, clinical relevance and enhanced performance for each workflow.
• An extensive code base simplifies development of new applications, modules and services using complementary components, subsystems and plug-ins – for the flexibility to grow as needed.
• Superb interoperability connects individual systems or scales up to provide enterprise-wide clinical data management and collaboration.
• Enjoy consolidated governance of all connected systems, plus simplified administration, user access, security, license management and system monitoring.
Set the Foundation for Truly Collaborative Healthcare.
The Clinical Collaboration Platform is much more than a VNA. The Unified Core simplifies your IT infrastructure while integrating clinical workflows across departments – empowering users to collaborate for high-level care.
• Provide integrated workflow management and image access across the enterprise with modular administration and global worklist orchestration.
• Consolidate archives with a true enterprise repository that includes metadata acquisition, tagging and reconciliation.
• Unify the diagnostic workspace across multiple modalities including radiology, oncology follow-up, mammography and cardiology.
• Allow stakeholder collaboration by delivering images and reports within a zero-footprint enterprise viewer embedded within EHRs and patient portals.
• Gain real-time insight into business operations, patient safety and clinical outcomes with seamlessly integrated radiation-dose monitoring and clinical analytics.
• Add capabilities as business needs evolve: expand service through telemedicine; provide interactive multimedia reports; reduce unnecessary exams with regional image exchange; and improve efficiency with business intelligence and clinical analytics.

Serve the Needs of Users Across the Enterprise and Beyond.
The Unified Core eliminates departmental silos, streamlines workflows and maximizes the value of clinical images.
• Add applications, modules and services as needed to meet growing enterprise requirements quickly and affordably.
• Unify management and maintenance across departments, clinical systems and locations to eliminate redundancy, ensure consistency and lower overall costs.
• Integrate existing IT systems and hardware to extend their life and increase their value to users beyond departmental walls.
• Future-proof your IT architecture via unrestricted scalability.
• Easily maintain data integrity and security by integrating siloed and proprietary systems.
• Deploy the Clinical Collaboration Platform on-site, or choose our hosted Cloud services for predictable budgeting, best-in-class security and immediate access to the latest upgrades.
Connecting people and data. Anywhere.

The power of together.

Carestream’s Clinical Collaboration Platform.
Intuitive clinical content-management workflow across the entire enterprise.
Clinical Collaboration Platform gives all those who provide, manage, receive and reimburse care the ability to access the clinical data and images they need – using the preferred platform and screen for each workflow and setting.
Through full integration with the enterprise’s electronic medical or health record, meaningful clinical data within its appropriate context is always available for delivery to key stakeholders. Across disparate sites and networks. Between departments and information technologies. Among providers and payers. Around each episode of care and each patient’s clinical history.
Carestream does more than integrate data and systems. We allow each stakeholder to view the patient’s complete imaging record, including priors – closing knowledge gaps that would otherwise be created by disjointed systems and data sources. We enable transparency. And we help your teams collaborate around a shared goal: putting patients at the center of efficient, effective healthcare.

Want to learn more about the Platform?
Visit carestream.com/collaboration to see how the power of together can help you provide true patient-centric care.

Carestream also offers leading-edge image capture solutions across a wide array of modalities. The gold standard in X-ray film. And, when it comes to digital output, our laser imagers and self-service kiosk provide high-quality solutions for all imaging modalities.

A Community of Service and Support.
For dependable service, look to our Customer Success Network.
We work continuously to improve your imaging performance, help you to innovate as needs change, and make the most of your budget and resources. Carestream’s Customer Success Network surrounds you with a dynamic team of experts, with a Single Point of Entry for easy, customized access to the right people in every situation. You and your patients will benefit from the expertise and best practices only Carestream can deliver – based on thousands of customer engagements worldwide and our 100-year heritage in medical-imaging innovation.
